Colour chart

#19

See the full spectrum
of possibilities

Reynobond® Reynodual® Reynolux®

A maximum choice of colours and sizes

Colours give a building a character of its own. With our extensive selection of attractive colours, you can add that final touch to your project. Enjoy all the benefits of our products, aluminium panels and sheets.

Use this colour chart for a closer look at our standard colour offerings and envision a world of possibilities for making your next bold idea even bolder.

Plus, if you don't immediately see the colour you need, you can contact your sales representative for more information on our custom colour matching service.

For all your projects from 125m²

Small batches of Reynobond® aluminium composite panels offer you maximum flexibility, with a selection of 35 colours available from 125 m².

In a variety of widths up to 2 meters

Our aluminium composite panels and sheets are delivered in the standard width of 1500 mm. Other widths up to 2000 mm can be supplied on request.

Our aluminium panels and sheets are available in a nearly limitless range of colours, glosses and options

A full spectrum of finishes

Gloss level

Our aluminium panels and sheets come in 4 gloss levels:

- > MattXtrem gives a highly velvety surface with no light reflection
- > Matt gives a smooth surface and shows little to no sheen
- > Satin gives a silk touch to the surface and reflects a bit of light, retaining a pearl-like sheen
- > High gloss surfaces are the ones that reflect the most light of any

A wide variety of coating with a 20 years warranty

A good resistance to corrosion, UV and ageing and a good flexibility required for transformation are some of the advantages offered by Duragloss® 5000 and PVDF 70/30.

Other paint qualities are available on request. Ask for the datasheet for more information.

DURAGLOSS® 5000

A high-tech coating that optimally combines attractive appearance and long life. DURAGLOSS® is available in our full range of colours and glosses.

PVDF 70/30

A high-tech coating especially developed for architectural applications. It is well-suited for our whole satin range.

Reynobond® Reynodual® Reynolux®

Specific features

Reynobond®	
Composite panel made of two coated aluminium sheets laminated to both sides of a core	
CORE	FR (fire-retardant) or A2
LENGTH	from 2000 to 6000 mm
THICKNESS ALUMINIUM SHEET	0,5 mm
THICKNESS COMPOSITE PANEL	4 mm

Reynodual®	
Coil-coated double sheet aluminium panel	
LENGTH	from 2000 to 6000 mm
THICKNESS ALUMINIUM SHEET	1,5 mm
THICKNESS PANEL	3 mm

Reynolux®	
Pre-painted aluminium sheet manufactured through coil-coating	
LENGTH	from 250 to 6000 mm
THICKNESS ALUMINIUM SHEET	1,5 mm Other thicknesses available, please contact us.

Delivery terms

Most of our aluminium composite panels and sheets are delivered within 5 weeks exworks Merxheim, France. Dispatch time is starting from 2 weeks. For more information, please contact us.

About Reynobond® Architecture, Reynolux® Building and Reynodual® Building

Reynobond® aluminium composite panels, Reynolux® coil-coated aluminium sheets and Reynodual® double sheet aluminium panels are manufactured by Arconic Architectural Products SAS (AAP) based in Merxheim, France. The company is a subsidiary of Arconic Inc., an international leader for technologies, engineering and manufacturing processes. AAP offers a wide range of products for architecture and construction. As you can expect from a global company, AAP is certified according to the international standards ISO 9001 and ISO 50001 as well as OHSAS 18001.

Reynobond® Architecture, Reynolux® Building and Reynodual® Building panels and sheets are coated and bonded in France. AAP is also certified according to ISO 14001, indicating its voluntary engagement in reducing the impact of its activity on the environment at all levels: water, energy or waste.

BIM objects library

You can now import our 5 facade systems with our composite panels and pre-painted sheets, as well as our 140 textures in your projects to get the most realistic renderings.

DISCLAIMER

Laws and building and safety codes governing the design and use of AAP's products, and specifically aluminium composite materials, vary widely. It is the responsibility of the owner, the architect, the general contractor, the installer and the fabricator/transformer, consistent with their roles, to determine the appropriate materials for a project in strict conformity to all applicable national, regional and local building codes and regulations.
